UNAOHM TECHNOLOGY S.r.l.

SERVICE BULLETIN

Data: February 12 th, 2009

Instrument: EP3000 PREMIUM/EVO/BW/COLOR (with QPSK only)
Software Version: W 8.3.0 Former Version: W 8.2.4

Updates and modifications:

1. Upgrade of the correct recall of frequency (long pressure on “PR” key) in the programme menu, when passing from analogue to digital mode in the satellite range.

2. Optimization of the “double marker“ function and the calculation of the cable length (distance of an impedance mismatch) when both markers are set on digital mode.
